Calgary technician wins the regional competition of Best of Belron and qualifies for the national final

Calgary, October 25, 2017 – Ryan Adams, a Speedy Glass technician from Calgary, won first place at the Prairies regional final of the Best of Belron (BOB) international competition. Following his performance in the windshield repair and replacement procedures, which he executed with precision and completed in record time, Ryan is now qualified for the national final which will be held in Montreal on January 19.

“I am very proud to represent the Prairies at the national level, declared Mr. Adams. This challenge allowed me to really push my limits and show how much my work means to me. I hope that my performance in Montreal will allow me to travel to Frankfurt for the international final.”

Ryan has been working at Speedy Glass for almost 10 years now. He was up against three of his peers from Red Deer, Saskatoon and Kindersley. He completed the challenge using all the best tricks of the trade.

“At Belron, the international group Speedy Glass is an important part of, technician training is a top priority. Representing 30% of the structure of a vehicle, the windshield plays an important role in ensuring the integrity of a car’s frame – especially upon impact or in the event of an accident, explained Brad Mcrae, Director of Operations for the Prairies. It is absolutely necessary that our expert technicians respect the highest standards on the planet when completing repair or replacement procedures to ensure the safety of motorists as well as that of their passengers”, he added.

About Best Of Belron

The *Best of Belron* competitions are held in all regions of the world where the company operates a brand of automotive glass specialists. This competition illustrates well what a technician’s work for the Belron brands represents: ensuring quality work as well as rapid and accurate execution that emphasizes customer safety and satisfaction.

The best technicians compete in regional, national and international glass repair and replacement challenges :

- **Challenge 1 - Repair:** requires close to 100 steps and uses patented tools as well as a repair system that is unique to Belron.
- **Challenge 2 - Replacement:** requires over 125 steps and also uses patented Belron tools.

- The main evaluation criteria for both challenges are speed, quality of execution and compliance with safety regulations.

About Belron Canada
